WOW TEACHER

This is a dynamic workshop, delivered to all teaching staff following a WOW KIDS or an EXAM BUSTER workshop so teachers will have seen their class excel in their workshop. We teach teachers the “why and how” of WOW SKILLS to ensure their understanding and therefore continuation of our WOW SKILLS. It’s a leadership and development workshop that’s fun and an exciting journey where teachers will be shown new exciting tools and techniques that will make an immense difference to your students’ education.

DESCRIPTION

This is a fun workshop that builds teachers confidence, ensures their understanding of accelerated learning and how to integrate these tools every day into the curriculum..

Run in your school hall or library after school closes or on a teacher development day. It’s a fun, fast paced 90-minute workshop crammed with accelerated learning techniques that promise to inspire and motivate your staff.

BENEFITS

Your teachers learn these accelerated learning skills and how to incorporate them into their own classrooms. They will have seen their students excelling in their workshop now the teachers learn and share best practices of these techniques.

Your teacher’s confidence in using these tools will increase and their own creativity enhanced – teaching becomes more fun and engages all their students.

WOW SKILLS

During the workshop, teachers will:

Be more confident and believe in accelerated learning skills as an important addition to their teaching style.

Explore more practical applications of these tools.

Learn how whole brain teaching massively enhances the learning of their students.

Learn how their small changes make a big difference.

GOALS

We prove to teachers that the old ways of teaching can be enhanced by adding these WOW SKILLS to their toolboxes

We love inspiring teachers to use these techniques as we feel like we are teaching the school to fish rather than handing them a fish. Teachers have seen their class excel and now they get to learn how to continue that.

“I was blown away with how much information I learnt and recalled – these tools will profoundly impact our school with all our teachers onboard.” Head Teacher
